Consumers in possession of these products are urged not to consume them.

In coordination with the Food Service in the Ministry of Health, **MKF Group Ltd.** is taking action to recall the products from the market.

In otherwise healthy individuals, salmonella may cause illness whose symptoms include fever, diarrhea (sometimes bloody), nausea, vomiting, and stomach aches. In rare cases, complications may occur. Invulnerable individuals such as young children, the immunosuppressed and the elderly, the bacteria may cause severe illness and sometimes even death.

Listeria Monocytogenes are bacteria that may cause illness in high-risk populations such as the immunosuppressed or the elderly and may induce miscarriage in pregnant women.

MKF Group Ltd. apologizes to its customer public and is taking actions to recall the products from shelves.

For product returns, please contact us at 0532463584 or mkfgroup@gmail.com
